------------	--------	---------

Walmart

• Black Spray Paint (X2)	\$7.48	Receipt
--------------------------	--------	---------

Palace Auto

• Water Pump	\$40.00	Receipt
	Total:	\$183.40

Warren at Palace Auto

• Donated a coil, points, condenser, rotar, and cap.	\$0.00
--	--------

1. Truck will start and run.
2. Replaced some damaged wiring.
3. Gas Tank pulled, cleaned and reinstalled.
4. Water Pump replaced.
5. Head and taillights working
6. **Brakes are the biggest obstacle. The master cylinder has been pulled off to check on a rebuild or new one; not pushing fluid. All wheel cylinders and brake lines need to be checked; critical because we won't be able to move the truck in the event a reserve pumper needs to be stored at #6; we would need to pull rear axles to access rear cylinders.**
7. Siren working; not top, visual warning light.
8. Cosmetic things need to be done: tailboard and sideboards need paint, etc.
9. Tires appear good.
10. Need Interior makeover at some point in the future; as money/time allow.
